or

call the events team on +44(0)20 7549 3300

or

register online at www.ciria.org

The problem

Under the various current contaminated land regulatory regimes, different parties involved in the management of purchasing, redeveloping, insuring and remediation of contaminated land all have varying levels of knowledge, responsibilities and expectations for how the process should be completed. The UK framework for managing contaminated land is similarly varied depending on the stakeholder role or financial, liability and regulatory driver. The variation in operational, regulatory and stakeholder expectations is often one of the most difficult aspects to manage when implementing a contaminated land project.

A solution

This workshop is designed for local authorities and other construction professionals involved in contaminated land project management. It will comprise of a series of presentations that will take delegates through the contaminated land project management process and give delegates the opportunity to apply knowledge gained through a short group exercise.

Programme

10.00	Registration and refreshments	13.00	Lunch
10.30	Introduction to the day	13.45	Managing consultants The module will cover training on the need for, and how to, effectively manage consultant contracts and information provision
10.45	Basic concepts in contaminated land project management Setting out the context of contaminated land project management with the UK, with a focus on managing the processes and the differences between the various regulatory regimes and stakeholder roles	14.15	Health and Safety - Construction (Design & Management (CDM) Regulations This module will include a description of the applicable health & safety aspects that relate to contaminated land projects, in addition to the roles and responsibilities of stakeholders. The discussion will include a particular focus on the 2007 CDM Regulations
11.15	Securing funding Identification and discussion of the various funding options available for contaminated land projects	15.15	Refreshment break
11.45	Refreshment break	15.30	Stakeholder consultation and case studies Delegates will have an opportunity to discuss consultation strategies within a case study framework
12.00	Procurement process Identification and discussion of the various procurement processes that can be utilised for the successful delivery of contaminated land projects	16.00	Summary
12.30	Tendering A discussion and presentation of the key areas required for the preparation, issue and assessment of tender documents	16.15	Close

Further information

Venue details issued on receipt of registration form. Please photocopy for additional delegates. Any local authority that joins the LACL Network within one month of attending a workshop, will receive a full refund for one delegate.

TERMS AND CONDITIONS

Any booking fee paid will not be refunded unless written confirmation is received at least five working days before the event, substitute delegates are welcome.

*For non-member registrations, your place is confirmed once the registration form is submitted; bookings must be accompanied by payment in the form of cheque or credit card authorisation.

Email confirmation of your booking will be sent out by CIRIA two weeks before the event.

CIRIA reserves the right to vary the programme and cancel the event in case of insufficient bookings.

Personal data is gathered in accordance with the Data Protection Act 1998. CIRIA will only contact you about products and services relevant to you and your organisation

CIRIA's Local Authority Contaminated Land network (LACL) now with 100 members helps local authorities to understand and address their responsibilities regarding land contamination. These include implementing risk assessment and remediation under Part IIA of the Environmental Protection Act 1990 and other statutory duties such required by the Town and Country Planning Act 1990.

LACL complements CIRIA's other networks, the Construction Industry Environmental Forum (CIEF) and the Construction Productivity Network (CPN). It is designed specifically to address the needs of local authority officers with contaminated land responsibilities.

CIRIA is a member-based, not-for-profit organisation with extensive publications on contaminated land issues.

CIRIA's contaminated land research is also highly regarded by construction professionals. An independent study, commissioned by Defra, ranked CIRIA as the most influential non-government body in this area, with guidance that is both accessible and worthwhile.

For further information on LACL membership, and forward programme, please contact the events team at CIRIA:
